Summary

A computer programmer specializing in full-stack web development. Experienced with all stages of the development cycle for building efficient, user friendly, responsive and dynamic websites. Well-versed in numerous technologies, graphical interfaces and integrated development environments. Specialized technologies include Laravel, PHP, HTML5, CSS3, JavaScript, Bootstrap 3 & 4, MySQL, JQuery, Ajax, datatables, Composer and NPM. Proficient with Git and GitHub online version control as well.

Skills

- Excellent communication & writing
- Detail oriented
- Analytical thinker
- Complex problem solver
- Motivated & autonomous
- Quick learner
- Project management
- Team player oriented

Qualifications

Developed numerous projects scaling from small to large, written in clean and concise code. Many of the projects I have worked on typically include a relational database (if required) and use Laravel's preferred paradigm, MVC. I have a strong understanding of OOP and adequate knowledge of RESTful API. A demonstration of my capabilities can be observed on my most recent website called calorieworld.com. Additional projects are also available on my personal website sited above.

Education

October 2018 - November 2019

- Quebec Attestation of Collegial Studies in **Computer Programming**

Experience

Freelance - December 2020

- Developed a full-stack daycare themed website for client (www.childrenblocks.com)
- Developed an internal user interface with the ability to create, read, update and delete clients and family members data with the use of a relational database design structure
- Planned and managed the entire development cycle for the client's internal and external website
